

Nature's PARTY

OUR STORY

Presentation is everything. Nature Party's heritage is rooted in our passion for making the most creative, fun, eco-friendly tableware. We are the sister company of the eco friendly French-American foodservice manufacturer Packnwood.

Party hosts won't just get complimented for their culinary creations - but for the way they are displayed. By tapping into our experience with more than 100 top chefs in NYC and Paris we are able to create the trendiest tableware on the market.

We look forward to making your party greener!

ECO-FRIENDLY MATERIALS

SUGARCANE, also called Pulp or Bagasse, comes from the natural residue of the Sugarcane harvest. 100% biodegradable and compostable.

BAMBOO is the fastest growing plant on the planet, growing as large as 24 inches every day. It is 100% biodegradable. Nature's Party cultivates the best.

WOOD from specially curated forests located all over the world. We replace every tree we use.

CORN STARCH Polylactic acid or polylactide is a biodegradable thermoplastic aliphatic polyester derived from renewable resource like Cornstarch.

PALM LEAF We make elegant and eco-friendly plates just by collecting the sheaths of a palm tree, which naturally dry, fall, and regenerate all on their own. The best part is we don't ever have to cut down a single tree!

RETAIL READY

From start to finish Nature's Party products are ready for any retail establishment with bright and fun customer friendly packaging! All of our unique and eco-friendly products are easily visible. Retail displays are also available for displaying these earth friendly party supplies.

PRIVATE LABEL

Private labeling of our products is available. We can add your logo to all of our products, change the product size, pack size and color.

Nature's Party - CO2 Neutral Company

Working in collaboration with CO2logic, we estimated the carbon emissions generated by our bio-based products and developed a carbon calculator to assess our product-related emissions. This calculation includes all relevant contributors of a package's carbon footprint such as raw materials, energy use (for manufacturing and storage) and logistics. End of life emissions have been excluded as no reliable data is available for the customer disposal, after the products have been delivered to our clients. However, we want to stress the importance of not sending compostable products to landfills to minimize the environmental impact.

Amongst our bio-based products, palm leaf products emit the lowest emission, while sugarcane products emit the highest (but are still much better for the environment than plastic alternatives). Taking direct responsibility for our emissions is our commitment as a sustainable packaging innovator. This is why all our sustainable and innovative packaging solutions sold in North America are certified CO2 Neutral in compliance with the PAS 2060 standard.

We offset all unavoidable greenhouse gas emissions by supporting a climate project in Uganda. Thanks to Nature's Party annual contribution and active participation of local communities, we preserve about 5,000 trees. This investment also supports the local infrastructure, avoids toxic fumes and offsets more than 1,000 metric tons of CO2.

Every customer who uses our certified CO2 Neutral packaging solutions is making an active contribution to protecting the climate. At the same time, the use of CO2 neutral packaging can have a positive effect on your company or event's own carbon footprint.

**450+ stoves
built**

**+170 tons
of avoided
charcoal**

**5,000+
